Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 10-12, 14 and 15 rejected under 35 U.S.C. 102(b) as being anticipated by EP 1059470 to Ford. Ford shows a connection plate 7 with a piston 23 inserted in a cylinder 24 formed in the plate, wherein the piston actuates a clutch via a spring diaphragm 21. The connection plate 7 also includes cylinders 30 for supporting shift rod 29 and ball detent 32 for actuating the transmission gears.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 13, and 16-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over EP 1059470 to Ford. Ford doesn't show a range or a splitter gearbox, but it would be obvious to one of ordinary skill in this art to apply the invention of Ford to those applications because it would be a use a known technique to improve a similar device in the same way. The piston 23 and cylinder 24 appear to be hydraulically actuated, but it would have been obvious to one of ordinary skill in this art to use pneumatic actuation instead, and to use pneumatic actuation for the shift rods 29 also because it would have

also been the use of a known technique to improve a similar device in the same way. It would have been further obvious to one of ordinary skill in this art to make the piston and cylinder 23, 24 of Ford coaxial with the shaft 4 because it would have been obvious to try such a solution from a finite range of possible arrangements without any unexpected results.

Prior Art Discussed

The examiner has considered the references cited by applicant in his Information Disclosure Statements filed April 11, 2006 and April 12, 2007.

The reference cited by the examiner is deemed pertinent to applicant's disclosure.
